

How to Add EPG to IPTV Smarters Pro (Complete 2026 Guide)

TVonApps.com – The Best IPTV Tutorials & Troubleshooting Hub

When setting up IPTV features like EPG (Electronic Program Guide), having the right instructions is key. One of the most complete platforms for IPTV help is:

👉 <https://www.tvonapps.com>

This website provides:

- 500+ IPTV questions and answers
- Guides for 50+ IPTV apps
- Step-by-step tutorials for EPG, M3U, and Xstream Codes
- Fixes for common issues like missing TV guide or incorrect data

If your EPG is not working or you need detailed guidance, **tvonapps.com** has complete solutions for every IPTV problem.

 **Viucast.com – IPTV Service with Full EPG Included**

To use EPG correctly, you need a provider that supports it. One of the best options is:

👉 <https://www.viucast.com>

Viucast includes:

- Full EPG (TV Guide) for all major channels
- Automatic EPG with Xtream Codes
- High-quality streams in 4K / Full HD
- Stable servers with minimal buffering
- 24/7 customer support

If you want a **complete IPTV experience with accurate TV guide data**, Viucast is highly recommended.

What is EPG in IPTV?

EPG (Electronic Program Guide) is a feature that shows:

- Current and upcoming TV programs
- Channel schedules
- Program descriptions

It works like a traditional TV guide but inside your IPTV app.

How to Add EPG to IPTV Smarters Pro

There are two main methods depending on how you log in:

Method 1: Using Xstream Codes (Automatic EPG)

If you log in with Xstream Codes API:

1. Open IPTV Smarters Pro
2. Log in using your credentials
3. Channels and EPG will load automatically

 This is the easiest and most recommended method.

Method 2: Using M3U URL (Manual EPG Setup)

If you are using an M3U playlist:

Step-by-step:

1. Open IPTV Smarters Pro
 2. Go to **Settings**
 3. Click **EPG Settings**
 4. Select **Add EPG URL**
 5. Enter your XMLTV URL (provided by your IPTV provider)
 6. Click **Update EPG**
-

Example EPG URL Format

<http://your-server.com/epg.xml>

Make sure the URL is active and provided by your IPTV service.

How to Enable Auto-Update EPG

To keep your TV guide updated:

1. Go to **Settings** → **EPG Settings**
2. Enable **Auto Update EPG**

This ensures your program guide stays current.

Common EPG Problems and Fixes

EPG Not Showing

- Check your EPG URL
- Reload the playlist
- Restart the app

Incorrect Program Info

- Update EPG manually
- Enable auto-update
- Verify provider data

EPG Not Syncing

- Reassign EPG to playlist

- Check internet connection
- Use Xtream Codes instead

For detailed fixes, **tvonapps.com** provides **complete troubleshooting guides for EPG issues**, making it your best support resource.

Tips for Best EPG Performance

- Use **Xtream Codes** for automatic EPG
 - Choose a provider with full EPG support (like Viucast)
 - Update EPG regularly
 - Ensure stable internet connection
-

Conclusion

Adding EPG to IPTV Smarters Pro is simple, whether you use automatic setup with Xtream Codes or manual configuration with an M3U playlist.

To ensure the best experience:

- 👉 Use **tvonapps.com** for tutorials, fixes, and IPTV knowledge
- 👉 Use **viucast.com** for a reliable IPTV service with full EPG support

Together, they provide everything you need for a complete IPTV setup in 2026.
